ADMINISTRACION DE JUSTIZIA

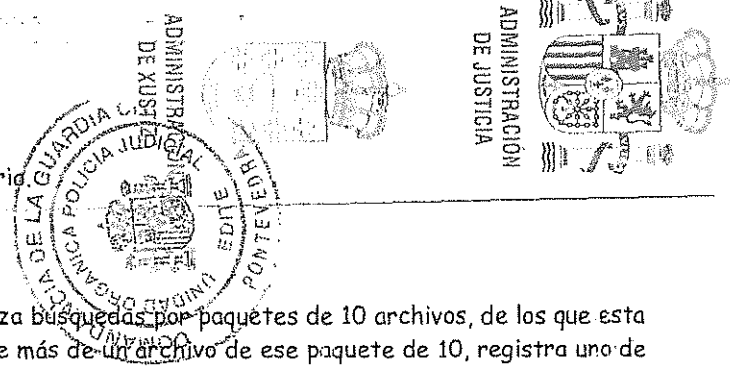

ADMINISTRACION DE JUSTIZIA

**NOTAS PREVIAS:**

- 1.-Nº de Sesiones: Se refiere al número de veces que la aplicación ha detectado el fichero en cuestión al usuario.
- 2.-Nombre de archivo: Se refiere al nombre con el que se ha detectado el fichero al usuario.
- 3.-Nombre de archivo denominado "A4AF".- A4AF son las siglas de "Ask For Another File". La aplicación realiza búsquedas por paquetes de 10 archivos, de los que esta UTPJ cuenta en su base de videos indubitada de pornografía infantil. Cuando encuentra a un usuario que tiene más de un archivo de ese paquete de 10, registra uno de los nombres y el otro nombre lo denomina A4AF. La explicación a esto es que, tanto la aplicación VICUS como el propio E-mule, cuando encuentra a un usuario que posee más de 1 fichero de los que buscamos, pone la petición de uno de ellos "en cola" temporal, toda vez que un usuario solamente puede ser "fuente" de un único fichero. Si esa "fuente" tiene partes disponibles para otra, la aplicación decidirá a cual darle preferencia y a la otra le asignará A4AF.
- 4.-Nombre de archivo con caracteres no legibles o extraños.- Esto se debe a que el nombre del archivo detectado está escrito en alfabeto cirílico, chino o japonés o con caracteres especiales como \$,&, etc.

**Registro de usuarios sospechosos una vez filtrado:**
